Education

- 2003** Ph.D. in Electrical Engineering, Oklahoma State University, Stillwater, OK
Cumulative GPA 4.0/4.0
Dissertation: Experimental study of a quasi-optic synthetic phased-array terahertz imaging system.
Advisor: Prof. Daniel R. Grischkowsky
- 1998** B.S.E. in Electrical Engineering, University of Michigan, Ann Arbor, MI
Cumulative GPA 3.9/4.0, *summa cum laude*

Professional Experience

August 2017- present

Assistant Professor, Electrical & Computer Engineering (*Scopus H-Index: 31*)
Oklahoma State University

- Instructor for Advanced Engineering Electromagnetics, Microwave Engineering, Fiber Optic Communication Systems, Fundamentals of Electric Circuits, Experimental Methods I, Electromagnetic Theory
- Research in terahertz optoelectronics, metamaterials, electromagnetics, and wireless
 - Atmospheric terahertz communication channel characterization
 - Dynamic terahertz metamaterials
 - Dispersion management devices and theory
 - Wireless system design and testing
 - Electromagnetic device design (polarization control, modulators, lenses)
 - THz artificial materials, condensed matter physics, THz wireless, and THz electronics studies (Funded: NSF Major Research Instrumentation, \$603k)
- Research in Space Communications
 - Robust and high-data-rate hybrid rf/optical communication for lunar missions utilizing RF and optical communication links for upcoming lunar missions. (Funded: NASA EPSCOR: \$1.0M)
 - THz space electronics radiation hardening studies (Funded: AFOSR DURIP: \$117k)
- Research in Sensing and Measurement using Incoherent Visible Light
 - Gesture recognition
 - Non-contact heart and respiration rate monitoring (Funded: NSF CNS Core: \$140k)

- Glucose sensing
- Research in IoT (Internet of Things)
 - Oklahoma Rural Renewal Initiative delivering broadband to rural communities with TV Whitespace, co-PI: Seed Project 3, (OSU-VPR Tier 1, \$90k)
 - Livestock Monitoring using IoT LoRaWAN Technology (Aexonis, \$50k)
 - Soil moisture monitoring with UAVs and LoRaWAN (USGS, \$25k)
- Current Principal Research Advisor for 1 Masters and 3 Ph.D. students
- Past Principal Research Advisor for 2 Masters

January 2011-present

Founder & President Wavetech, LLC

- System Integration
 - Robotics – integrating Denso and Fanuc robots into manufacturing cells
 - Embedded – developing controls/interfaces for customer turn-key products
- Controls and Automation
 - Regularly serving the oil/gas industry
 - Local/remote process controls, man-machine interface, panel design, networking
 - Retrofitting, commissioning, and debugging of plant controls/hardware
- Consulting
 - Research and development on emerging technologies: electromagnetic materials, antennas, nondestructive evaluation, and terahertz
 - Terahertz/ultrafast optoelectronic laboratory design and recommendations
- Product Development
 - SBIR Phase 1 project for missile radome inspection
 - Light hardware and software products for terahertz laboratories
 - Currently completing development and marketing of IoT, wireless home appliance monitor, invented in-house

March 2011-July 2017Adjunct Associate Professor, Electrical & Computer Engineering
Oklahoma State University

- Instructor for Microwave Engineering and Introduction to Electrical Science (4000 and 2000-level undergrad courses)
- Subcontractor for Los Alamos National Lab (LANL) in the design and theoretical description of nonlinear metamaterials
- Actively engaged in funding generation, through government research arms (NSF)

2006-2011Technical Staff Member, Los Alamos National Laboratory (LANL)
Center for Integrated Nanotechnologies (MPA-CINT)

Projects

- Principal Investigator (PI) on internal LANL Directed Research project. Project was a theoretical and experimental study of nonlinear metamaterials from RF to optical – 3 year

duration, \$5M

- PI on one internal LANL Exploratory Research project involving energy-harvesting metamaterials at microwave frequencies – 3 year duration totaling \$2.4M
- PI on a Director of Central Intelligence Postdoc project involving metamaterial-based electromagnetic sources – 2 year duration, \$240k
- PI on a LANL Director's Funded Postdoctoral Fellowship (postdoc under my direct supervision) – 2 year duration, ~\$250k
- PI on one external research project involving terahertz and infrared metamaterials – 24 month duration totaling \$414k
- Metamaterial lead researcher and proposal author on an external research project with DARPA on tuning the Casimir force with metamaterials – 2 year duration, \$1.8M
- PI on LANL Exploratory Research project involving terahertz metamaterials – 3 year duration, \$1.1M
- PI on external research project involving the development of a compact terahertz time-domain spectroscopy system, ~\$370k
- Numerous side research projects in ultrafast semiconductor materials: MBE grown GaAs, ErAs, and TbAs composites. These were used to create high-performance THz devices.

Leadership

- Directly oversaw and managed staff and postdocs on large research teams from various divisions (LANL)
- Managed several ultrafast labs in terms of operations, safety, security, and environmental responsibility (LANL)
- Managed program development with external agencies (LANL)
- Managed intellectual property within research group (LANL and Wavetech)
- Hosted and co-hosted numerous postdoctoral researchers
- Served as technical point of contact for LANL/University sub-contracting.
- Held numerous clearances and helped manage information security.

2003-2005

Director of Central Intelligence (DCI) Postdoctoral Fellow, LANL

Center for Integrated Nanotechnologies (MPA-CINT)

Formerly with MST-10, Condensed Matter and Thermal Physics

- High efficiency THz photoconductive detectors based on self-assembled ErAs nano-island superlattices
- THz surface plasmon propagation and coupling studies
- THz spectroscopy and characterization studies on a variety of materials: metamaterials, nanoscale systems (wires, superlattices), organic systems, ultrafast materials, energetic materials
- THz ranging/imaging studies through highly scattering media

1999-2003

Research Assistant
School of Electrical and Computer Engineering
Oklahoma State University, Stillwater, OK.

- Developed, implemented, and modeled a quasi-optic, synthetic phased-array THz imaging system
- Developed general optoelectronic THz systems, spectroscopy, ranging, and waveguide systems.
- Studied THz wavefront analysis via hybrid geometric and diffractive optics methods

1998-1999

System Engineer,
Motorola SSG, Inc. Scottsdale, AZ

- Performed debugging and space-qualifying experiments on Deep Space Transponder components and system test equipment
- Performed system test procedures for MARS01/SIRTF mission flight transponders

Experimental and Technical Skills

- Extensive laboratory experience including design, fabrication, and maintenance of multiple systems involving CW, pulsed, and amplified lasers, THz and optoelectronics, optical pump-probe, fiber-optics, spectroscopy, microwave systems, scattering/ranging.
- Extensive data analysis and theoretical modeling experience, particularly concentrated on THz and time-domain spectroscopy.
- Extensive expertise in design and fabrication of complex systems involving electronics, vacuum, cryogenics, pneumatic, mechanical, and controls (software interfacing).
- Expertise in multiple computing platforms and languages: C, C++, Objective C, Java, Matlab, LabView, SCADA, ladder logic, Fortran, COMSOL, Microwave Studio.
- Extensive product development experience, particularly in IoT and embedded devices.

Professional Activities

Reviewer

- Optics Express
- Optics Letters
- Applied Physics Letters
- Applied Optics
- Optics Communications
- IEEE – JSTQE, AWPL
- J. of Lightwave Tech

- Intl. J. Infrared Millim. Waves

- Nature Scientific Reports
- Advanced Materials
- Chinese Optics Letters
- Lightwave Science and Technology
- APL Photonics

Memberships

- Senior Member - (IEEE)

Service

- SPIE Defense + Commercial Sensing, Next Generation Spectroscopic Technologies XIV: Program Chair, 2021.
- SPIE Defense + Commercial Sensing, Next Generation Spectroscopic Technologies XIII: Program Committee, 2020.
- Organizer of Intl. Workshop on Electromagnetic Metamaterials III and IV – a joint Los Alamos and Sandia hosted workshop.

 2. Nathan I. Landy, Hou-Tong Chen, **John F. O'Hara**, Joshua M. O. Zide, Arthur C. Gossard, Clark Highstrete, Mark Lee, Antoinette J. Taylor, Richard D. Averitt, and Willie J. Padilla, "Terahertz metamaterials for active, tunable, and dynamical devices," Proc. SPIE **6581**, 65810P-1-8 (2007). (*Invited*)
 1. R. Alan Cheville, Matthew T. Reiten, **John O'Hara**, Daniel R. Grischkowsky, "THz Time Domain Sensing and Imaging," Proc. SPIE **5411**, 196-206 (2004). (*Invited*)

Patents

3. **John F. O'Hara** and Ethan J. Abele, U.S. Patent 10,423,143, "Aerobic septic system health monitor and maintenance device, system, and method of its use," (Sept. 24, 2019).
2. **John F. O'Hara**, Richard D. Averitt, Willie Padilla, Hou-Tong Chen, U.S. Patent 8,836,439, "Dynamic frequency tuning of electric and magnetic metamaterial response," (Sept. 16, 2014).
1. Hou-Tong Chen, Willie John Padilla, Richard Douglas Averitt, **John F. O'Hara**, and Mark Lee, U.S. Patent 7,826,504, "Active terahertz metamaterial devices." (Nov. 2, 2010).

Applications or Provisionals

- §2. Sabit Ekin, Daqing Piao, and John F. O'Hara, US Patent App. No. US 63/053,004 "System and Method of Non-Contact Glucose Sensing," (July 7, 2020).
- §1. John F. O'Hara and Karl L. Strecker*, U.S. Provisional Patent 62/898,358 "Method and implementation of dispersion compensation in terahertz wireless signals," (Sept. 10, 2019).

Honors

- Senior Membership to Institute of Electrical and Electronics Engineers (IEEE), 2019.
- Oklahoma State University, College of Engineering, Architecture, and Technology Faculty Diversity and Inclusion Faculty/Staff of the Year Award 2018.
- PI and mentor on LANL summer student project. “High-speed broadband THz amplitude modulator”. Student Frank Chen received poster award and distinguished student award (only 4 given per year), 2010.
- **Edward E. Altshuler Prize Paper Award** (2013) Awarded for best contribution published in IEEE Antennas and Propagation Magazine during the previous year.
- Invited talks
 - SPIE-Defense + Commercial Sensing 2021, (online) – April 2021
 - SPIE-Defense + Commercial Sensing 2020, (online) – April 2020
 - SPIE-Defense + Commercial Sensing 2018, Orlando FL – April 2018
 - Physics Department Colloquium, Oklahoma State University – Feb. 16, 2012
 - SPIE Optics and Photonics Conference, Metamaterials: Fundamentals and Applications IV –Aug. 21-25, 2011
 - Physics Department Colloquium, University of Oklahoma – Feb. 18, 2011
 - 4th Intl. Congress on Advanced Electromagnetic Materials in Microwaves and Optics (Conference) – Sept. 13-16, 2010 – Karlsruhe, Germany
 - International Workshop on Electromagnetic Metamaterials II and IV – Aug 12, 2010 and Sept. 5, 2007 – Los Alamos, NM and Santa Ana Pueblo, NM
 - 4th Intl. Rio de la Plata Workshop on Laser Dynamics and Nonlinear Photonics – Dec. 8-11, 2009 – Piriapolis, Uruguay
 - Colloquium at Physical Sciences Lab – October 21, 2009 – College Park, MD
 - Optical Metamaterials Applications: Challenges and Opportunities, AFRL Workshop – Oct. 9, 2009 – Dayton, OH
 - New Frontiers in Casimir Force Control – Sept. 26-28, 2009, Santa Fe, NM
 - Workshop on Spatial Dispersion in Metamaterials, Transformation Optics, and Related Topics – May 28, 2008 – Duke University, Durham, NC
 - Physics Department hosted talks, University of California, Santa Barbara – May 17, 2007 – Santa Barbara, CA
 - IC Postdoctoral Research Fellowship Colloquium – May 2, 2007 – Chantilly, VA
- Director of Central Intelligence Postdoctoral Research Fellowship (award value ~\$240,000)
- Member Eta Kappa Nu, Electrical Engineering Honor Fraternity
- Member Tau Beta Pi, Engineering Honor Fraternity
- James B. Angell Scholar, University of Michigan, (1995, 1997).
- Dean’s Honor List, University of Michigan, (1994-1998).
