

MAE Student Leadership Centers: An inspiring place for MAE student leaders and organizations to call their own!

Leadership Offices and Conference Rooms: The mechanical and aerospace engineering leadership center offices and conference rooms provide our student leaders with a place to meet and collaborate— Mechanical on one side; Aerospace on the other. We think a little friendly competition between the two will keep these spaces vibrant and alive!

Student Project Galleries: The adjacent galleries provide a place for our student leaders to display the finest achievements, of our students—award winning research and senior design projects as well as competition winners
